Senior Front-End Developer with 7+ years of experience building scalable web applications with Vue.js, Nuxt, Vuetify, and TypeScript. Modernized an ERP platform for Swedish industrial companies, migrating 100+ pages/modules and making pages load 60%+ faster with SSR and code splitting. Experienced in owning features end-to-end, from client requirements and product decisions to UI design and delivery, working with product, UI/UX, backend, and international teams in startup and enterprise environments.

PROFESSIONAL EXPERIENCE

WEBBist AB — **Stockholm, Sweden (Remote)**

Senior Front-End Developer — **Nov 2023 - Present**

- Led the front-end modernization of an ERP platform used by industrial companies across Sweden, rebuilding it with Vue, Nuxt, TypeScript, Pinia, and Vuetify and migrating 100+ pages/modules to a maintainable architecture.
- Implemented Server-Side Rendering (SSR), code splitting, and lazy loading, cutting page load time from 5s to under 2s (60%+ faster), improving Core Web Vitals, and reducing initial bundle size by 75% (2 MB to 0.5 MB).
- Cut front-end code complexity by consolidating 40+ duplicated components and 15 form patterns into a shared component library, removing ~70% of the code in the migrated modules (by lines of code).
- Established development standards, reusable UI patterns, and front-end best practices, reducing PR review time by 50% and shortening onboarding for new developers to 2 weeks.
- Redesigned and shipped 5+ major features for IDEX25, a work-environment safety platform, working directly with the client to define requirements and product flows for shift scheduling, project management, report generation, and notification and ticketing systems. Planned, estimated, and coordinated front-end delivery as one of two developers, owning ~90% of the work.
- Championed CI/CD pipeline integration using GitHub Actions and Docker, reducing deployment errors by 30% and increasing release velocity by 5x.

PROCYCONS — **Frankfurt, Germany (Remote)**

Front-End Developer — **Feb 2023 - Jul 2023**

- Developed the core front-end of the MVP for a sustainability platform that assesses carbon footprint and reports environmental impact, delivering 3+ core features that supported early customer onboarding.
- Enabled rapid product validation with 10+ reusable components and responsive Vue.js interfaces.
- Translated stakeholder requirements into scalable user-facing solutions, integrating REST APIs across 20+ core workflows.

Freelance Front-End Developer — **Oct 2018 - Jan 2023**

- Delivered 10+ web application projects for startups and businesses across fintech, e-commerce, and real estate.
- Engineered maintainable Vue.js applications with reusable UI components and API integrations, collaborating with 6 cross-functional teams of designers, backend developers, and PMs in agile sprints.

EDUCATION

Associate Degree in IT Engineering, University of Kashan, 2016 - 2018

SKILLS

Core Stack: Vue.js, Nuxt.js, Vuetify.js, TypeScript, JavaScript, Pinia, Vue Router, HTML, CSS, SCSS

Architecture & Performance: SSR, Component Libraries, Performance Optimization, Code Splitting, Lazy Loading, i18n, SEO, Core Web Vitals, Accessibility (WCAG / a11y), Figma, REST APIs

Tooling & DevOps: Git, GitHub Actions, Docker, CI/CD, Vite, Vitest, Webpack, npm, Bun

Product & Delivery: Agile, Scrum, Product Management, Project Management

LANGUAGES

English (Professional Working Proficiency), **German** (Limited Working Proficiency), **Persian** (Native)
